EDUCATION

Bachelor of Technology in Information Technology (Honors)

S.R.K.R. Engineering College

- CGPA: 9.07/10

Bhimavaram, Andhra Pradesh

2020 – 2024

Intermediate

Aditya Junior College

- Percentage: 94.2%

Palakol, Andhra Pradesh

2018 – 2020

SSC

Sunshine EM High School

- CGPA: 9.8/10

Palakol, Andhra Pradesh

2018

WORK EXPERIENCE

Associate Software Engineer In Test

HealthEdge Software Pvt Ltd

Hyderabad, Telangana

Jan 2024 – Present

- Designed and executed performance/load tests for the company's product, as well as SPs and LINQs, using Apache JMeter to identify latency patterns and system breakpoints.
- Developed Python automation scripts to streamline performance reporting, including day-wise SLA and Graylog reports, JTL-to-Excel conversion, parameter verification, and IIS log-based SLA tracking, reducing manual effort by **70%**.
- Implemented real-time SLA monitoring in Datadog with automated alerts to Microsoft Teams, reducing manual monitoring effort by **80–90%** and enabling faster response to SLA breaches.
- Monitored production environments via Datadog to detect errors and coordinate quick fixes with development teams.
- Key Tools & Technologies:** Apache JMeter, Python, Datadog, Graylog, Excel, MySQL, Postman

AI-ML Intern

Henotic Technology Pvt Ltd

Bhimavaram, Andhra Pradesh

July 2022 – September 2022

- Developed a strong foundation in building ML models using various algorithms to predict target variables in datasets.
- Demonstrated ability to analyze and improve model performance by selecting the best model based on accuracy, precision, and recall.
- Gained experience in data preprocessing and feature selection for optimized model inputs and enhanced accuracy.

PROJECT EXPERIENCE

Heart Disease Prediction System Using Supervised Machine Learning Algorithms | [Link](#)

- Developed and deployed a user-friendly Heart Disease Prediction System website.
- Applied and trained ML models such as Logistic Regression, Random Forest, SVM, KNN, and XGBoost for heart disease risk classification.
- Evaluated models on accuracy and F1-score; selected XGBoost, SVM, and Random Forest as top performers, with tuned XGBoost achieving 83.26% accuracy and 0.82 F1-score.
- Optimized model performance using GridSearchCV hyperparameter tuning for improved reliability.
- Deployed the optimized XGBoost model into a Flask web application, enabling real-time predictions with preventive health recommendations.
- Technologies used:** Python, Scikit-learn, NumPy, Pandas, Matplotlib, Flask, Pickle

House Rent Prediction Using Machine Learning Algorithms | [Link](#)

- Developed ML model to predict house prices based on features such as area, bedrooms, location and etc.
- Acquired knowledge in ML algorithms, techniques, data preprocessing, and feature engineering methods
- Build models using Linear Regression, Decision Tree Regressor, Random Forest Regressor, XGB Regressor and feature selection by EDA, RFE.
- Evaluated model using Adjusted R-squared value and MeanAbsoluteError.
- **Technologies used:** Python, scikit-learn, numpy, pandas, Matplotlib, Pickle, Flask.

Speech Emotion Recognition Using Deep Learning

- Developed a CNN model for accurate Speech Emotion Recognition in speech audio to classify emotion.
- Performed data analysis on speech audio datasets to extract insights from waveplots and spectrograms.
- Implemented feature extraction using the Mel-Frequency Cepstral Coefficients (MFCC) technique.
- Trained the CNN model using the extracted features and corresponding emotion labels.
- Achieved a test accuracy of 55% in evaluating the model's performance.
- Evaluated model through recall score (55%), precision score (56%).
- **Technologies used:** Python, scikit-learn, pandas, Matplotlib, Keras, Librosa

Email Spam Detection

- Developed a Logistic Regression model on email spam detection using NLP techniques.
- Performed preprocessing steps like stop word removal and lemmatization for data cleaning.
- Converted the text into feature vectors using the TF-IDF vectorizer.
- Implemented a pipeline to convert the text data to vectors and to train the model.
- Achieved a test accuracy of 92% in evaluating the model's performance.
- Evaluated model through recall score (95%), precision score (90%).
- **Technologies used:** Python, scikit-learn, numpy, pandas, spacy.

SKILLS

- **Programming Languages:** Basic: C, Java
Intermediate: Python
- **Database Language:** MYSQL(Intermediate)
- **Performance & API Testing Tools:** Apache JMeter, Postman
- **Monitoring & Logging Tools:** Datadog, Graylog
- **Web Development:** HTML(Intermediate), CSS(Basic), Javascript (Basic)
- **Python Web Framework:** Flask
- **Packages:** NumPy, Pandas, Matplotlib, Seaborn, Keras, Tensorflow, Librosa, Spacy, NLTK.
- **Algorithms:** Linear Regression, Logistic Regression, Decision Tree, Random Forest, K Nearest Neighbors, Support Vectors Machine, PCA, CNN, RNN, LSTM, GRU, Transformers.

ACHIEVEMENTS

- Recognized as Star Performer (Q3 2025) at HealthEdge for outstanding performance.
- Recognition of Best Performance Award in AI-ML Internship 2022.
- Secured 1st place in college level Techthon 2022.
- Secured 2nd place in Code Unscramble event in Techfleet 2023 conducted by CSI.

CERTIFICATIONS

- Data Science and AI Campus Program by Surge Classes.
- Data Analytics with Python by NPTEL.
- Data Science For Engineers by NPTEL.
- Certificate on Programming Essentials In Python by Cisco.
